

B&O JUNIOR JUNCTION

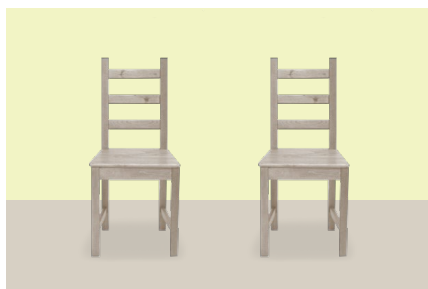

BRIDGE BUILDING CHALLENGE

Put your best architect to the test by having them build their own bridge.

MATERIALS:

- 2 chairs
- Household building materials, such as straws, construction paper, yarn/string, Legos, toothpicks, index cards, paper clips, etc.
- Small toy train or car

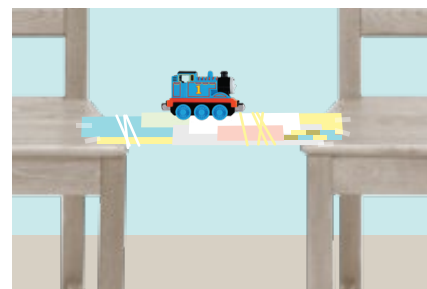

INSTRUCTIONS:

1. Set up two chairs leaving space between to build your bridge.

2. Using household objects, design a bridge that will allow a vehicle to travel from one chair to another.

3. Use your favorite toy train or car to test your bridge. See if your design can safely carry your vehicle between the chairs.

Share your design with us on social media using **#BOJrJunction**, and don't forget to tag the B&O!
