

# B&O JUNIOR JUNCTION

## MAKE YOUR OWN DINOSAUR FOSSIL

### MATERIALS:

• Playdough

• Dinosaur Toys

• School Glue

### INSTRUCTIONS:

**1.** Press and smooth down your playdough into ¼-½ inch discs. Your playdough discs should be thick enough that your dinosaur figures will leave an impression without breaking through.

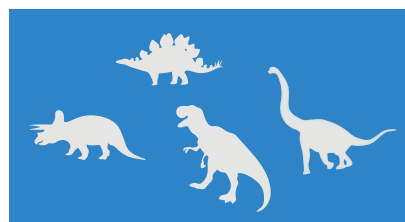

**2.** Experiment with pressing the whole dinosaur, or just particular parts like the feet or horns, into the dough. Be sure to press your dinosaur hard enough to leave an impression that can be filled with glue.

**3.** Then, use your glue to fill in the impression that your dinosaur left in the dough.

**4.** Finally, set everything aside and let the glue dry for 1-2 days.

**5.** When the glue has dried, your little paleontologists can begin to peel the fossil out of the playdough!
